

## TSLOTS Aluminum Framing System is Expanding Operations

March 4, 2021

NEWNAN, Ga.--(BUSINESS WIRE)--Mar. 4, 2021-- Bonnell Aluminum, a subsidiary of Tredegar Corporation (NYSE: TG), is pleased to announce that its TSLOTS line of aluminum structural framing systems is expanding operations into the Midwest region of the United States.

The TSLOTS aluminum framing system allows manufacturers to create light, durable, attractive, strong, versatile, and functional structures using custom T-slotted aluminum extrusions and connecting hardware. In addition to manufacturing and distribution from the Clearfield, Utah site, a new leased facility, operated in conjunction with Bonnell Aluminum's existing Niles, Michigan location, provides 12,550 square feet of warehouse space for TSLOTS inventory. This additional storage capacity will improve customer service levels for the Eastern and Midwestern United States, including reduced shipping costs and shorter lead-times.

Steve Silvester, TSLOTS Sales Manager, commented, "Over the years as TSLOTS has grown, our customers in the Midwest and East have been asking for a location closer to theirs. By providing materials that ship from the Midwest, our customers will gain the benefits of being competitive in terms of costs and lead-time." Mr. Silvester added, "We are proud of our growth over the past two decades, and with Bonnell Aluminum having locations across the country, TSLOTS can service our customers in the best possible way!"

TSLOTS is a full-service operation providing project design assistance, fabrication, custom packaging, and full assembly. For more information about TSLOTS, please visit [www.tslots.com](http://www.tslots.com).
