(a) Net debt is defined as total debt less cash and cash equivalents. Net debt is not intended to represent total debt as defined by GAAP. Net debt is utilized by management in evaluating the Company's financial leverage and equity valuation, and management believes that investors also may find net debt to be helpful for the same purposes.

(b) Accelerated depreciation was excluded from EBITDA from ongoing operations. Depreciation and amortization expense for Aluminum Extrusions in the third and fourth quarters of 2019 includes accelerated amortization of \$2,510 and \$7,530, respectively, related to the rebranding of the Bonnell Aluminum name and discontinuation of the trade names AACOA and Futura.

Tredegar's presentation of net income (loss) and diluted earnings per share from ongoing operations are non-GAAP financial measures that exclude the effects of gains or losses associated with plant shutdowns, asset impairments and restructurings, gains or losses from the sale of assets, goodwill impairment charges, discontinued operations and other items (which includes unrealized gains and losses for an investment accounted for under the fair value method) which have been presented separately and removed from net income (loss) from continuing operations and diluted earnings per share as reported under GAAP. Net income and diluted earnings (loss) per share from ongoing operations are key financial and analytical measures used by management to gauge the operating performance of Tredegar's ongoing operations. They are not intended to represent the stand-alone results for Tredegar's ongoing operations under GAAP and should not be considered as an alternative to net income (loss) from continuing operations.

EBIT (earnings before interest and taxes) from ongoing operations is a non-GAAP financial measure included in the reconciliation of segment financial information to consolidated results for the Company. It is not intended to represent the stand-alone results for Tredegar's ongoing operations under (d) GAAP and should not be considered as an alternative to net income as defined by GAAP. EBIT is a widely understood and utilized metric that is meaningful to certain investors. We believe that including this financial metric in the reconciliation of management's performance metric, EBITDA from ongoing operations, provides useful information to those investors that primarily utilize EBIT to analyze the Company's core operations.

(c) Net sales represents gross sales less freight. The Company uses net sales as its measure of revenues from external customers at the segment level.

(f) In the fourth quarter of 2019, the Company changed its segment measure of profit and loss from operating profit from ongoing operations to EBITDA (earnings before interest, taxes, depreciation and amortization) from ongoing operations. EBITDA from ongoing operations is the key profitability metric used by the Company's chief operating decision maker to assess segment financial performance. See Note 5 in the Notes to Financial Statements in the Form 10-K for additional business segment information.

(g) The gains and losses on the Company's investment in kaléo are included in "Other income (expense), net" in the consolidated statements of income. See Note 4 in the Notes to Financial Statements in the Form 10-K for more details for the years 2020, 2019 and 2018.

(h) In December 2020, the Company entered into a definitive agreement and completed the sale of Bright View. See Note 2 in the Notes to Financial Statements in the Form 10-K for more details.

Corporate depreciation and amortization is included in Corporate expenses, net, on the EBITDA from ongoing operations table above.

- (j) Equity market capitalization is the closing market price per share for the period multiplied by the shares outstanding at the end of the period.
- Due to rounding, numbers presented throughout this worksheet may not add up precisely to the totals provided.
